AHMED EL-DEEB

IRRIGATION ENGINEER

+20 1114760037 | ahmedeldeeb4555@gmail.com | LinkedIn Profile | Al Haram, Giza

Professional Summary

Experienced Irrigation Engineer with over 5 years in designing irrigation systems. Proven track record in ensuring timely, high-quality project delivery. Proficient in RainCad, Water GEMS, AutoCAD and Civil 3D to optimize irrigation network designs. Strong skills in client communication, project management, and team development. Committed to leveraging my technical and leadership skills to drive organizational success.

Personal Information

- Nationality: Egyptian
- Date of Birth: 01/05/1998
- Gender: Male
- Religion: Muslim
- Marital Status: Single
- Military service: Exempted

Education

Bachelor's degree: Agricultural Engineering (Jan. 2016 - Jan. 2020)
Faculty of Agricultura, Cairo University – Giza

- **Grade**: Very Good with honor degree, 83.54%
- **Graduation Project (Grade: Excellent)**: Design and Installation of Multi- Stroke Positive Displacement Pump.

Training

- Agricultural Engineering Research Institute, Dokki.
- Shira for trade & agencies.

Work Experience

Sr. Technical Office Engineer (Nov. 2024 – Till Now)
DME Holding – Heliopolis-Cairo

- Prepare shop drawings for irrigation networks and other systems as per project requirements.
- Issue as-built drawings for completed work, ensuring accurate documentation of changes during construction.
- Prepare calculation sheets, time schedules, and pump calculations to support the planning and execution of projects.
- Coordinate with site engineers and other teams to ensure proper execution and compliance with project specifications.
- Review and verify designs and technical documents to ensure they meet the required standards.
- Provide technical support to the construction team and resolve any on-site issues.
- Follow up on project progress and ensure timely submission of reports.
- Ensure all work complies with local building codes, safety standards, and project specifications

Technical Office Team Leader (Jun. 2023 – Nov. 2024)

Typical Design - Maadi Cornish, Giza

- Meet with clients to discuss project objectives and other requirements.
- Review all designs and documents, as well as develop and review specifications, including design criteria, before delivery to the client to ensure high-quality and timely delivery.
- Define the project management process to be applied to the project.
- Select the most effective irrigation equipment, methods and materials for the project based on water availability.
- Scheduled and planned daily tasks, training and development for team members.
- Prioritized workflow and resolved daily operational challenges to support goal achievement.
- Delegated projects and distributed tasks to team members as per area of expertise.
- Coached team to develop skills and overcome weaknesses to reach goals.
- Handle and resolve conflicts and interface issues within the project.
- Collaborated with senior leadership to share and gain insight on best practices and improve monthly goals.

Technical Office Engineer (Nov. 2020 - Jun. 2023)

Orascom Services - Nile City Towers, Corniche, Cairo

- Issue a tender design for irrigation networks.
- Make a shop drawing for irrigation networks.
- Design irrigation networks Using RainCad.
- Follow up on the implementation of the irrigation system.
- Issue final as built for irrigation system.
- Preparing calculation sheets, time schedules, and pump calculations for the project.
- Design farms irrigation networks.
- Design pump & filtration units for irrigation systems.
- Irrigation mainline networks analysis using Water GEMS.
- Sales support, make MAR (Material approval request) for the project.
- Conducting training programs for students and recent graduates on various irrigation products and the design of irrigation networks.

Technical Office Engineer (Nov. 2019 - Nov. 2020)

Shira Group – Masaken Sheraton, Cairo

- Issue a tender design for irrigation network.
- Make a shop drawing for irrigation network.
- Design irrigation networks Using RainCad.
- Follow up on the implementation of the irrigation system.
- Issue final as built for irrigation system.
- Preparing calculation sheets, time schedules, and pump calculations for the project.

Technical Support Engineer (Aug. 2019 - Nov. 2019)

Shira Group – Masaken Sheraton, Cairo

- Communicated with end-users to assess technical issues, determine root cause and create actionable resolutions timely manner.
- Responsible for working with different systems, software, and hardware and follow standard procedures to escalate unresolved issues to appropriate internal departments.
- Diagnosed and troubleshot complex technical issues related to Irrigation equipment.
- Monitored service-related performance metrics and recommended appropriate steps to support continuous improvement.
- Maintained service logs to document troubleshooting functions and applicable resolutions.
- Leveraged internal knowledge bases and resources to deliver accurate technical solutions.
- Training site engineers in the operation of irrigation equipment, devices, and water management software.

Technical Skills

- Excellent at Microsoft Office (Word, Excel, Power Point, Outlook).
- Excellent at using AutoCAD.
- Excellent at using Rain CAD.
- Excellent at using Water GEMS.
- Excellent at using Auto fluid.
- Excellent at using Graphic Design Programs (Photoshop, Illustrator and InDesign).
- Good at using Civil 3D.
- Good at using Land FX.
- Good at using Hummer.
- Good at using Sewer GEMS.
- Good at using InfraWizard
- Revit MEP (in Progress).

Courses

- ICDL course at Russian Cultural Center.
- AutoCAD course at Creative Group.
- English course (General& Conversation) at Reach Out Academy.
- Rain Bird knowledge center diploma.
- Graphic design Track at Cad Masters Training and Solutions.
- Landscape design diploma at Arvil Group.
- Infrastructure Diploma at Cad Masters Training and Solutions.

Languages Skills

- Arabic: Mother tongue
- English: Very good on reading and writing, Good on speaking and listening.

Skills

- Presentation skills
- Ability to work in a group or individually according to the Job requirements
- Scheduling
- Coaching
- Training
- Public speaking
- Communication skills
- Troubleshoot service issues
- Teamwork
- Self-learning
- Decision making
- Leadership
- Prioritization
